

The United States of America

The Commissioner of Patents and Trademarks

*Has received an application for a patent
for a new and useful invention. The title
and description of the invention are en-
closed. The requirements of law have
been complied with, and it has been de-
termined that a patent on the invention
shall be granted under the law.*

Therefore, this

United States Patent

*Grants to the person or persons having
title to this patent the right to exclude
others from making, using or selling the
invention throughout the United States
of America for the term of seventeen
years from the date of this patent, sub-
ject to the payment of maintenance fees
as provided by law.*

[57] **ABSTRACT**

A lacrosse stick head comprising a frame and netting attached to the frame. The frame has two sidewalls extending from a throat portion to a mouth portion thereof. Each sidewall includes an upper wall section and a lower section having an inner wall segment that extends inwardly towards the central longitudinal axis of the frame, and an outer wall segment that extends downwardly from the upper wall section. The inner wall segment is shorter than the outer wall segment and spaced a selected distance away from the mouth portion. Each outer wall segment has a bottom edge with holes therein, these holes being provided to attach the netting. In a preferred version, there are several side-by-side holes arranged in a row along one or both sides of a shank end portion of the head. These holes are used to secure and adjust several longitudinal thongs of the netting.
